

The American Radio Relay League (League) last week filed with the Commission a comprehensive proposal regarding amateur radio licensing matters. As the author of RM-10354, I am sending a letter to the Secretary detailing my comments.

In brief, the latest League filing essentially endorses the basic thrust of RM-10354, the comment period for which expired two years ago. With that endorsement, the time is ripe for immediate action by the Commission to act on RM-10354 and, to an extent, the March 2002 League filing, RM-10413.

Extraneous issues in the League's latest filing, such as code/no-code and the content of the written license examinations, can be reserved for later consideration.
